Darling International Inc. Announces First Quarter 2009 Results

PRNewswire-FirstCall IRVING, Texas

Darling International Inc. today reported first quarter net income of \$4.8 million, or \$0.06 per share, for the first quarter ended April 4, 2009. Sales and results of operations for the first quarter as compared to the same period of the prior year are as follows:

For the first quarter of 2009, the Company reported net sales of \$133.0 million as compared to \$202.0 million for the first quarter of 2008. Lower finished product prices and reduced raw material volume accounted for the majority of the \$69.0 million decrease.

Net Income for the first quarter of 2009 decreased to \$4.8 million, or \$0.06 per share, as compared to \$21.5 million, or \$0.26 per share, for the 2008 comparable period. The \$16.7 million decrease in net income for the first quarter resulted primarily from lower finished product prices and decreases in both volume and yield of raw material, which were partially offset by lower energy costs related to natural gas and diesel fuel.

Darling International Inc. Chairman and Chief Executive Officer Randall Stuewe said, "We are off to an improved start in first quarter 2009 versus the challenges we faced in the fourth quarter 2008. The major optics of our business are presently favorable relative to history, however, raw material volumes remain sluggish. Overall, we are pleased with our performance in first quarter as we were able to reduce our operating costs to compensate for the lower input volumes."
