Forward-Looking Statements

This presentation contains forward-looking statements regarding the business, operations and prospects of Darling and industry factors affecting it. These statements are identified by words such as “may,” “will,” “begin,” “look forward,” “expect,” “believe,” “intend,” “anticipate,” “should,” “potential,” “estimate,” “continue,” “momentum” and other words referring to events to occur in the future. These statements reflect Darling's current view of future events and are based on its assessment of, and are subject to, a variety of risks and uncertainties beyond its control, including disturbances in world financial, credit, commodities and stock markets; potential changes in national and foreign regulations affecting the company's products; a decline in consumer confidence and discretionary spending; the general performance of the U.S. and global economies; global demands for bio-fuels and grain and oilseed commodities, which have exhibited volatility, and can impact the cost of feed for cattle, hogs, and poultry, thus affecting available rendering feedstock; risks, including future expenditure, relating to Darling's joint venture with Valero Energy Corporation to construct and complete a renewable diesel plant in Norco, Louisiana and possible difficulties completing and obtaining operational viability with the plant on a timely basis, or at all; risks relating to possible third party claims of intellectual property infringement; risks associated with the development of competitive sources for alternative renewable diesel or comparable fuels; challenges associated with the Company's ongoing enterprise resource planning system project; economic disruptions resulting from the European debt crisis; and continued or escalated conflict in the Middle East, North Korea, or elsewhere, each of which could cause actual results to differ materially from those projected in the forward-looking statements. Other risks and uncertainties regarding Darling, its business and the industry in which it operates are referenced from time to time in the Company's filings with the Securities and Exchange Commission. Darling is under no obligation to (and expressly disclaims any such obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.

This presentation also contains information about Darling's adjusted EBITDA, adjusted net income and adjusted earnings per share, which are not measures derived in accordance with GAAP and which exclude components that are important to understanding Darling's financial performance. Investors should recognize that these non-GAAP measures might not be comparable to similarly titled measures of other companies. These measures should be considered in addition to, and not as a substitute for or superior to, any measure of performance, cash flows or liquidity prepared in accordance with accounting principles generally accepted in the United States.

Darling International is the

Oldest

A Family Heritage

- ▶ Darling & Co. was founded in 1882 by the Swift and Darling families to meet the needs of the growing Chicago meat-packing industry.
- ▶ Over 130 years old
- ▶ Listed as 984 on Fortune 1000
- ▶ Fastest growing public company in Dallas, TX

Largest

National Presence

- ▶ Over 120 locations
- ▶ Servicing all 50 states
- ▶ Largest rendering company in US
- ▶ One of the largest bakery residual recyclers in North America
- ▶ Largest used cooking oil recycler in North America
- ▶ Top organic fertilizer company
- ▶ Operating one of the largest private trucking fleets in US
- ▶ Approximately 3,400 employees

Most Innovative

Pioneers

- ▶ **1998** - Began the country's first continuous biodiesel plant utilizing waste greases
- ▶ **2013** – Startup of the nation's largest animal fat to hydrocarbon recycling facility, designed to produce 9,300 barrels of renewable diesel per day
- ▶ **2013**– Commissioning “first of a kind” waste extraction unit

A History of Transition

Soap &
Fertilizer

Fertilizer &
Feed

Feed, Fuel, and
Fertilizer

Feed

Animal Fats, UCO, Proteins

- Commodity ingredients
- Specialized pet food ingredients
- Custom aquaculture ingredients

Fuel

Animal Fats, UCO

- Boiler fuels
- Biodiesel
- Renewable diesel (green diesel)

Fertilizer

Enriched Animal Proteins

- Organic fertilizer

UCO – Used Cooking Oil

Our Reporting Segments & Business Model

Rendering

Bakery

What sets DAR apart?

Differentiator	DAR	Integrated	Regionals
National Presence (over 120 locations)			
Integrated Trucking			
Value-Added Focus			
Multi-Specie Plants			
Integrated Biofuels			

Room to Grow Base Business

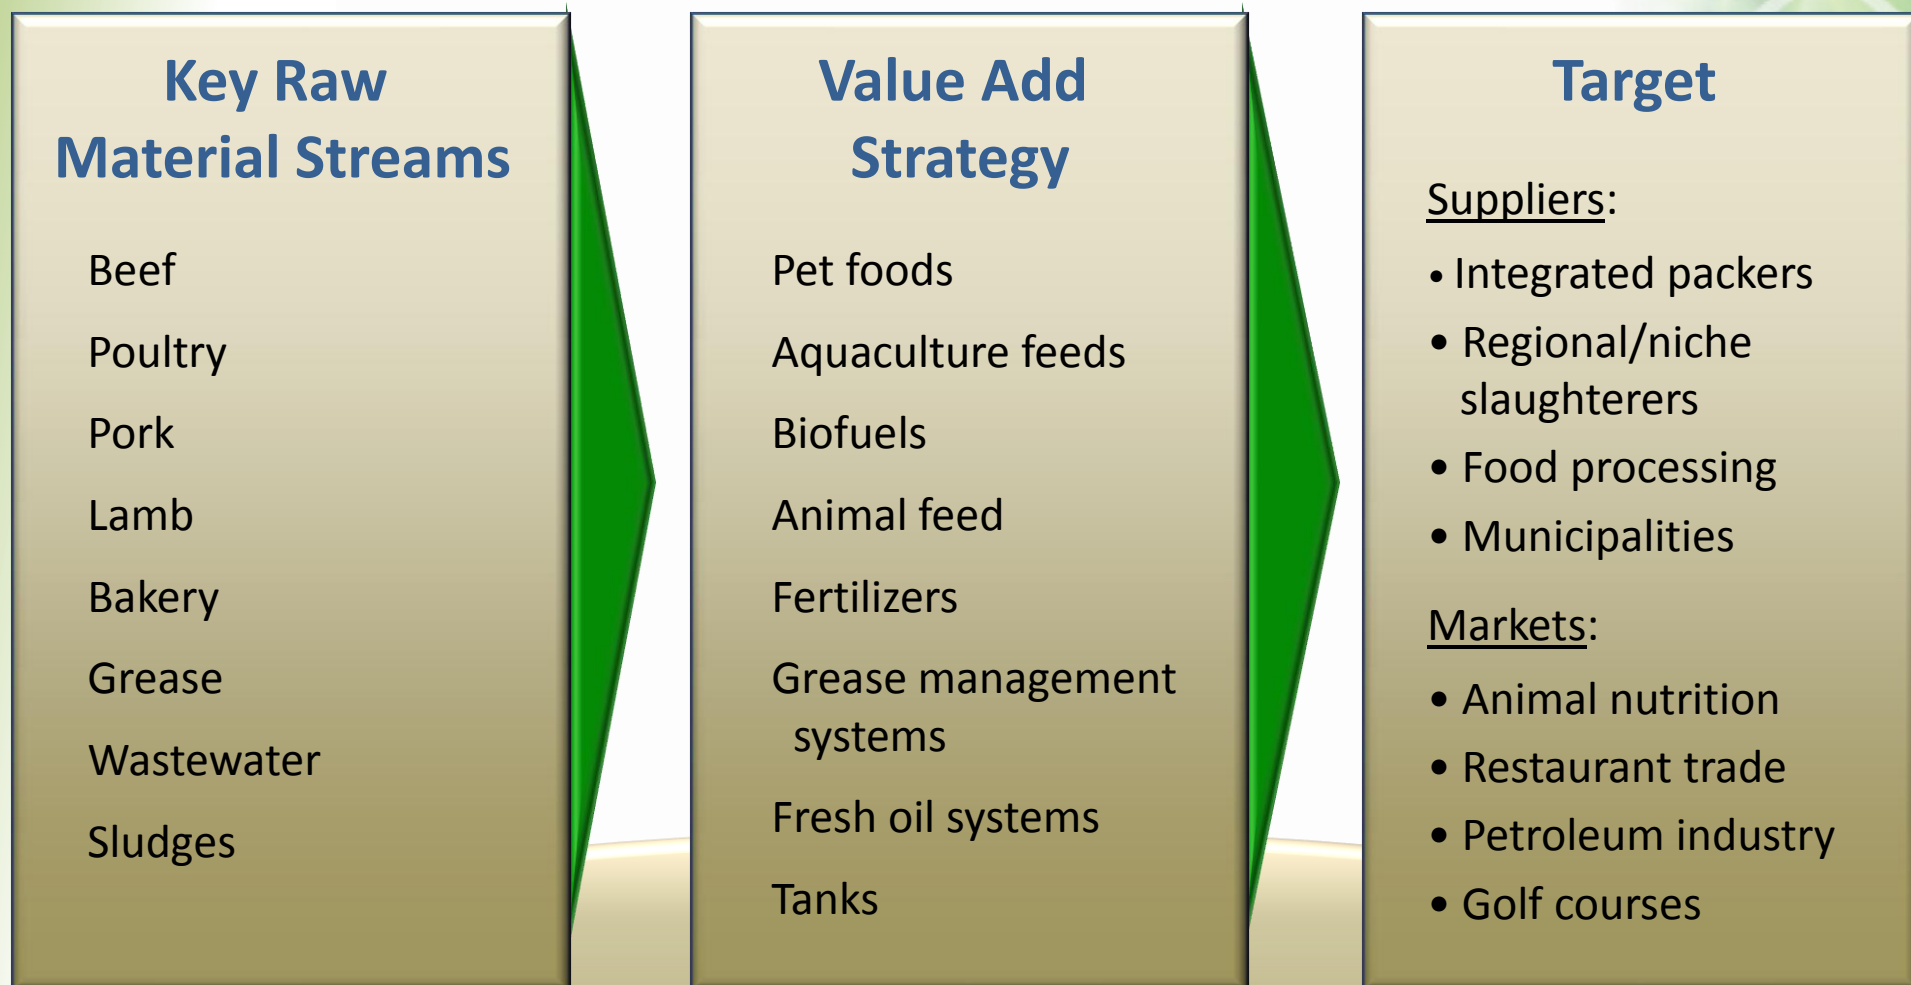

Note 1: USDA 10-yr CAGR in millions lbs.

Note 2: Darling 10-yr Market Cap Growth

Note 3: Rendering segment does not include used cooking oil volumes

Our Value Proposition

Transforming raw materials into value-added ingredients

200,000+ Customers/Suppliers

Our Performance Profile

- 1 National Presence
- 2 Integrated Supply Chain with Built-in Margin Management
- 3 Exceptional Customers and Suppliers
- 4 Solid Margins
- 5 Passionate about Growth

**Superior Return
to Shareholders**

1

National Presence

Darling Rendering – *Processing and Transfer Facilities*

- Corporate/Regional Office
- Processing/Transfer Facility

Darling Bakery – *Processing and Transfer Facilities*

Bakery Industry

- ♻️ Approximately 3.0 million tons of bakery residuals are created annually
- ♻️ Servicing commercial baking, snack, cookie and cracker producers
- ♻️ Additional food safety regulations and traceability should help “scrape” rates grow

2

Integrated Supply Chain with Built-in Margin Management

Revenue Business Model

Raw Material/Finished Products

- ♻️ Diversified supply of raw material
- Approximately 75% of our raw material is procured under a processing agreement, whereby margins are established and the risk is shared. The balance is a “fee for service” business.

3

Exceptional Customers & Suppliers

Exceptional Customers & Suppliers

4 Solid Margins

5-Year Earnings, EPS and Cash Flow

Net Income (US\$ millions)

EBITDA (US\$ millions)

Note: 2009-2010 EBITDA numbers include proforma of Griffin Industries

Earnings Per Share (US \$'s)

EBITDA – CAPEX (US\$ millions)

Note: 2009-2010 EBITDA- CAPEX numbers include proforma of Griffin Industries

Historical Financials - Capex

Capex (US\$ millions) 1

Note: 2009-2010 includes combined proforma of Griffin Industries

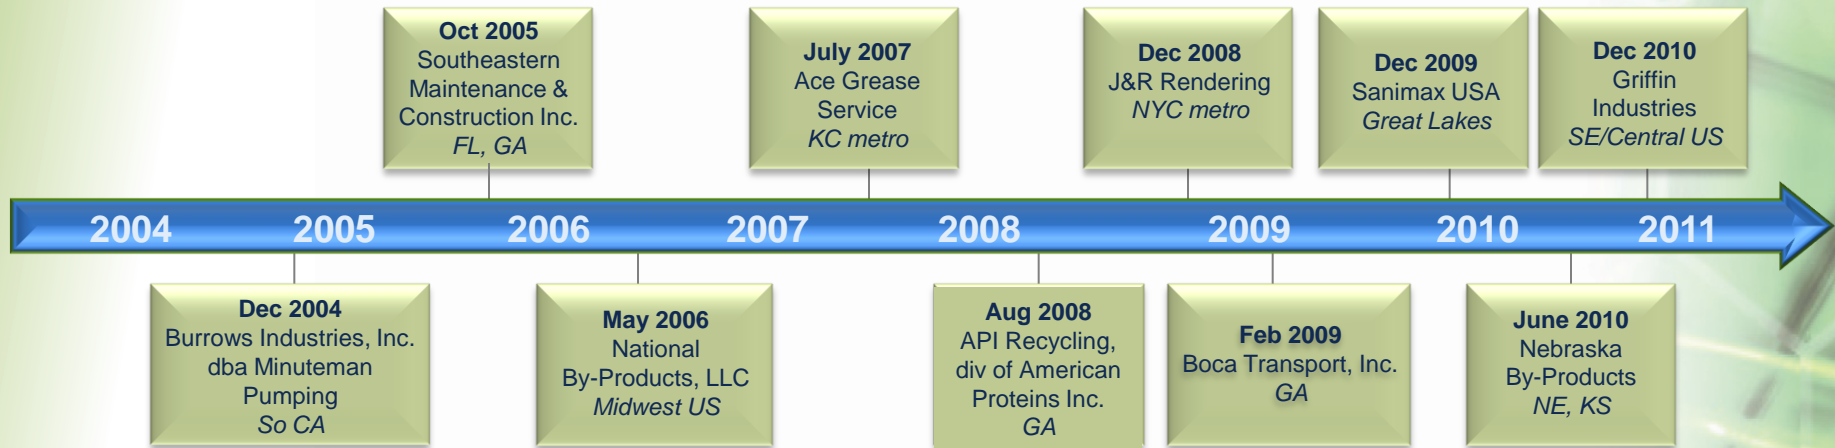

Source: Company Management

¹ Griffin capex includes capex and investments, including acquisitions.

5 Passionate About Growth

Passionate About Growth

Since 2003, Darling has acquired and integrated 10 companies / businesses investing over \$1.1 Billion

10 Years of DAR Growth

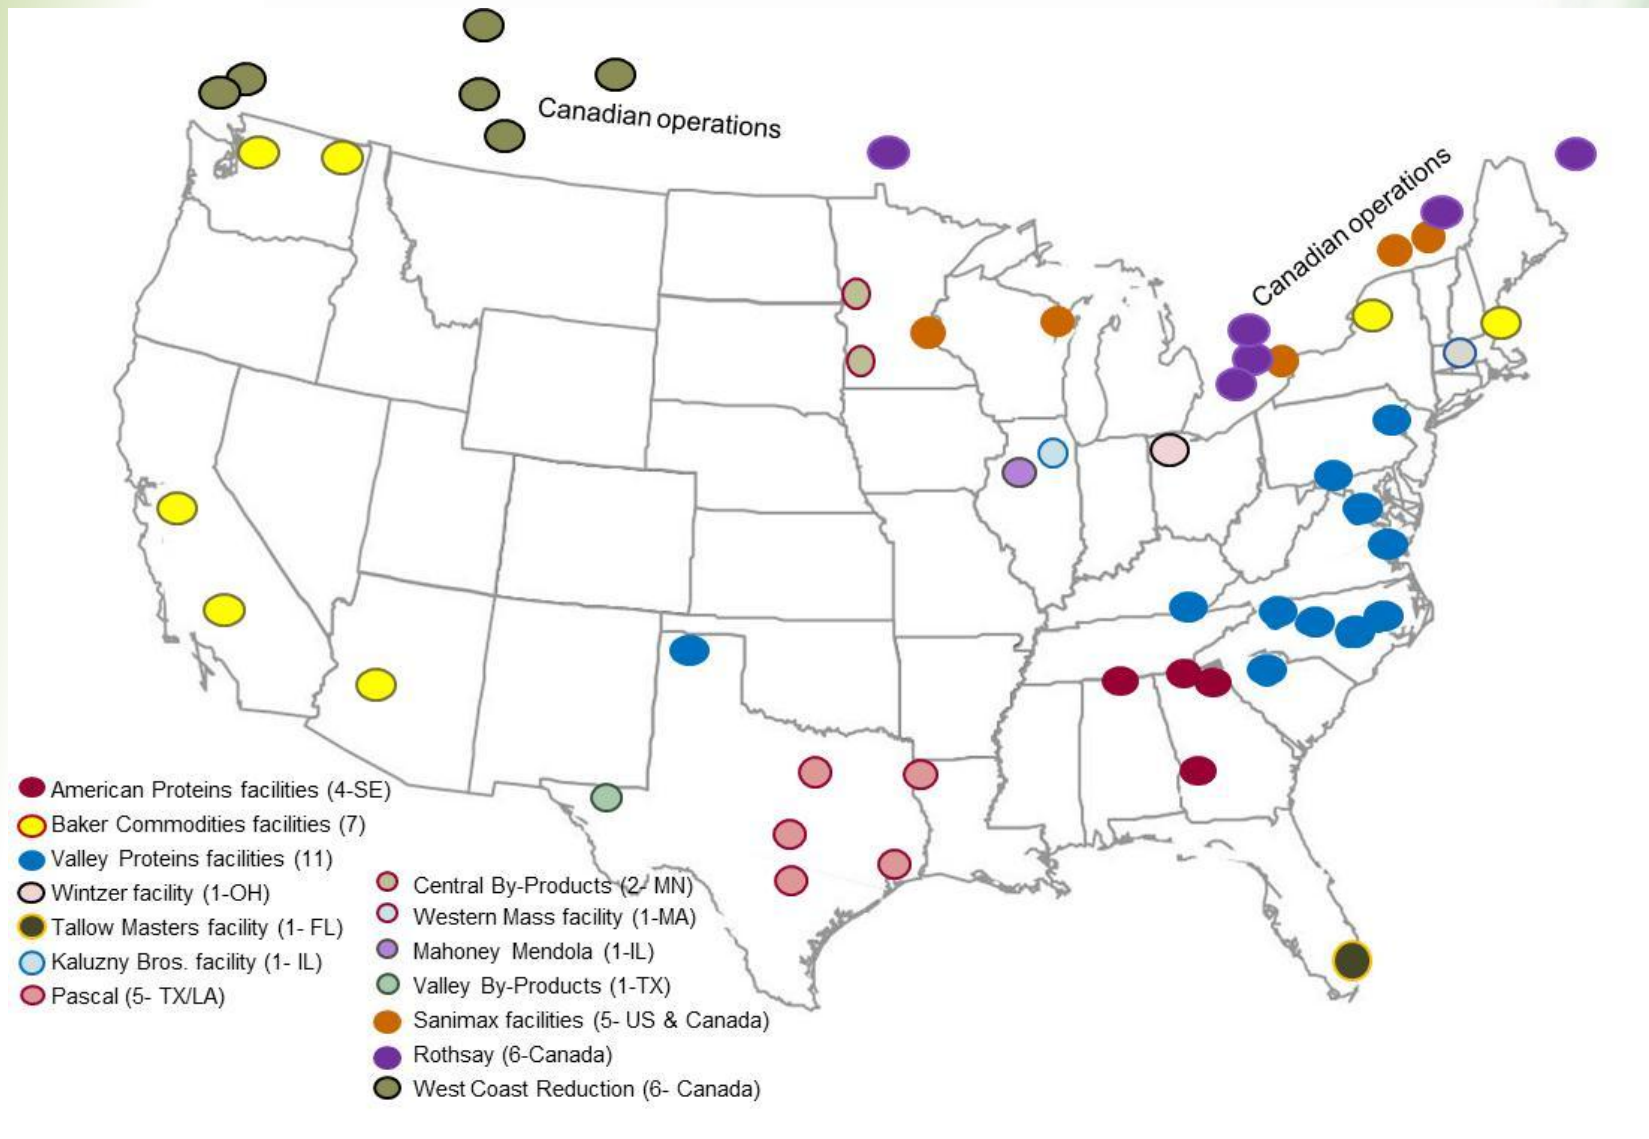

WM – Waste Management; TSN – Tyson Foods; BE – Bunge; ADM - Archer Daniels

Areas for Growth Focus

- ♻️ Acquisition of other independent rendering companies
- ♻️ New locations for recycling Bakery residuals
- ♻️ Integrated oil delivery systems
- ♻️ Hexane extraction fat recovery
- ♻️ Expansion of Diamond Green Diesel

Rendering Companies – *Growth Opportunities*

Fresh Oil System

Integrated Oil Delivery & Removal

- ♻️ Small footprint
- ♻️ Additional storage
- ♻️ Delivers fresh oil
- ♻️ Monitors usage
- ♻️ Collects used oil

Hampton Extraction Plant

Secondary protein nutrients (SPN), also called dissolved air flotation (DAF), float or skimming's, is a wastewater byproduct that is produced by the poultry industry. Today a majority of this product is land applied.

We estimate several billion pounds of this product is available annually.

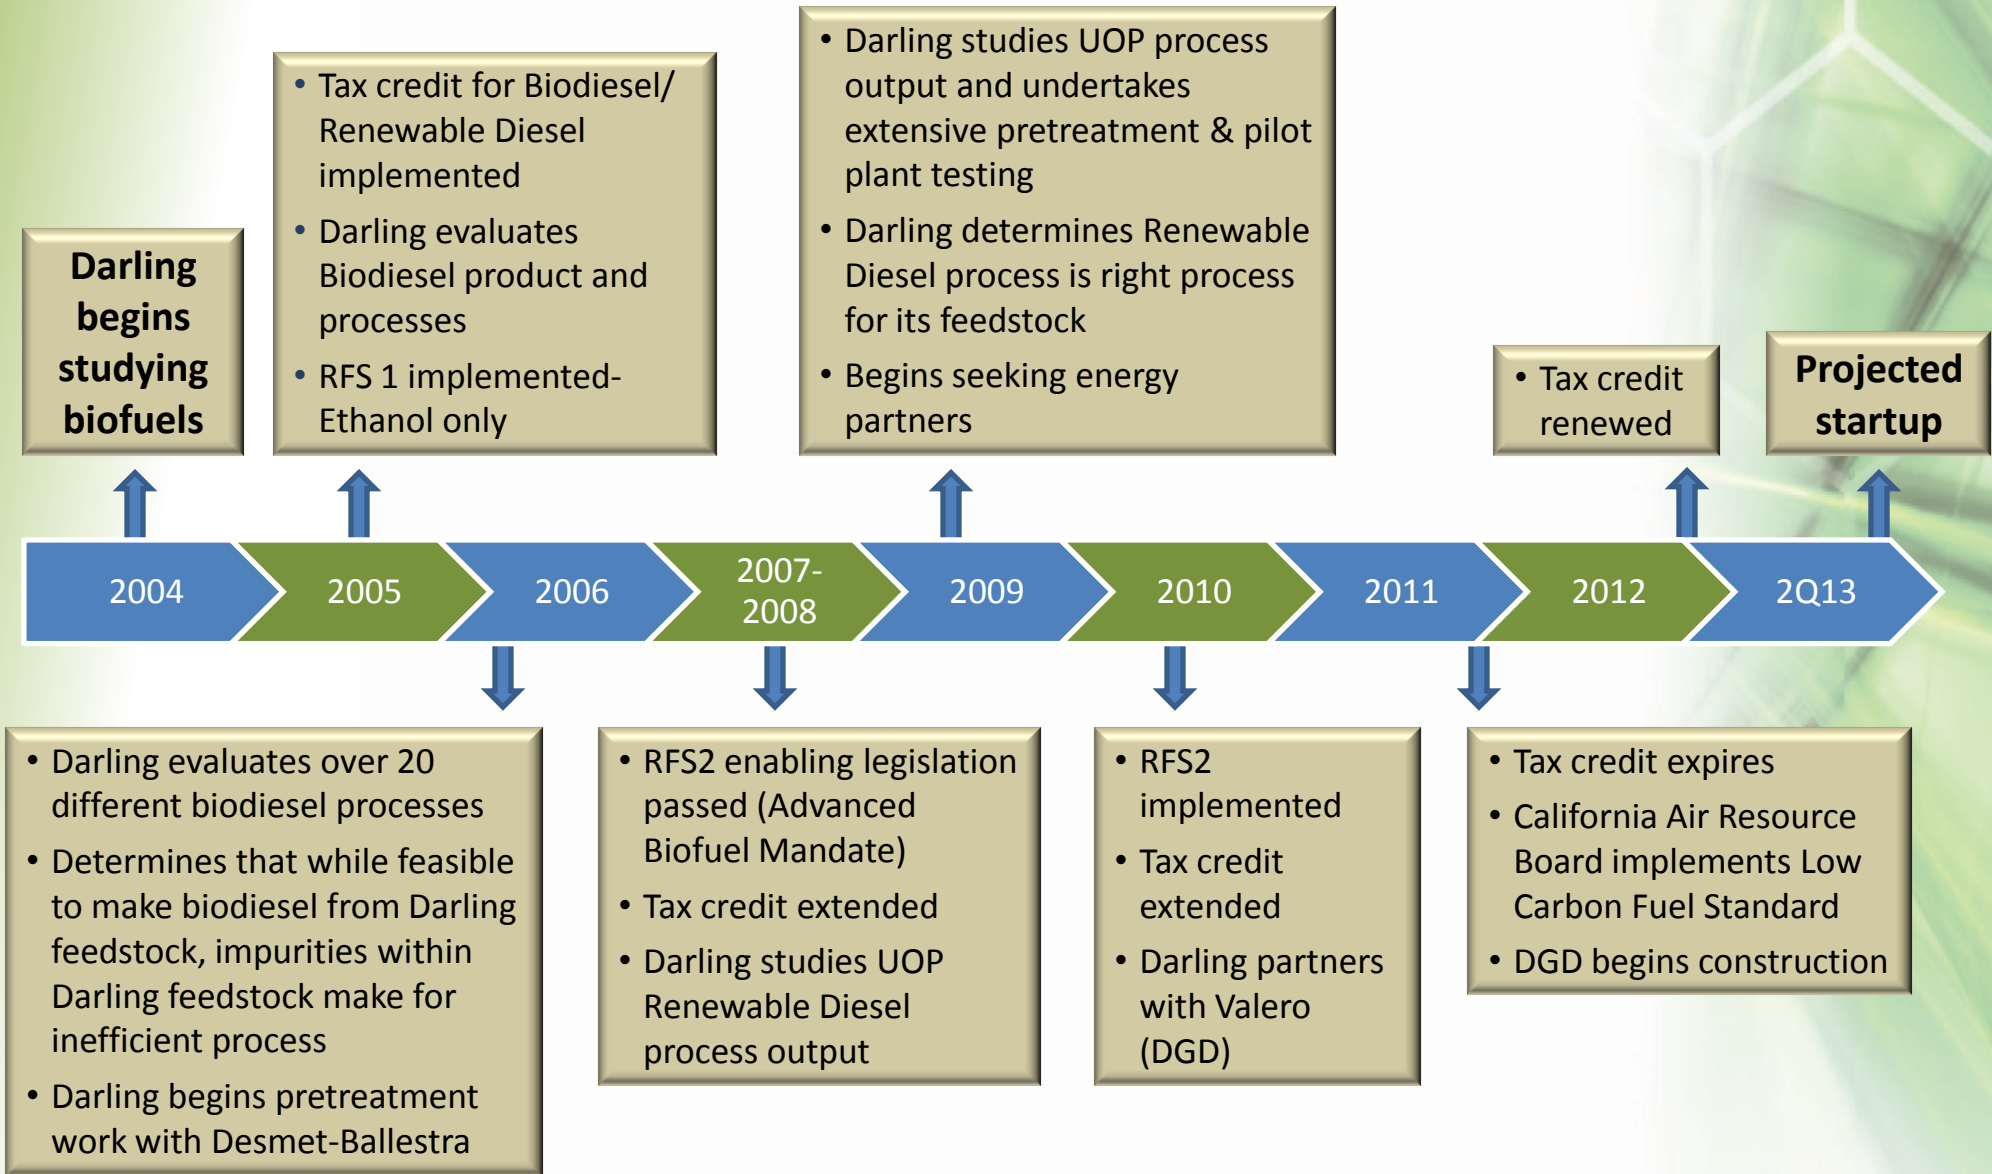

Diamond Green Diesel

Darling Biofuels

The Path to Here

What is DGD?

- ♻️ 50/50 JV with Valero Energy Corporation
- ♻️ Construct and operate a 136.7 million gallon Renewable Diesel plant located next to Valero's 3rd largest oil refinery in Norco, Louisiana using Desmet-Ballestra pre-treatment and UOP eco-finishing technologies

	\$-Millions
Total Project Cost	\$427.5 (includes working capital)
Partners Capital	\$206.5
JV DEBT	\$221

Why DGD is Being Built

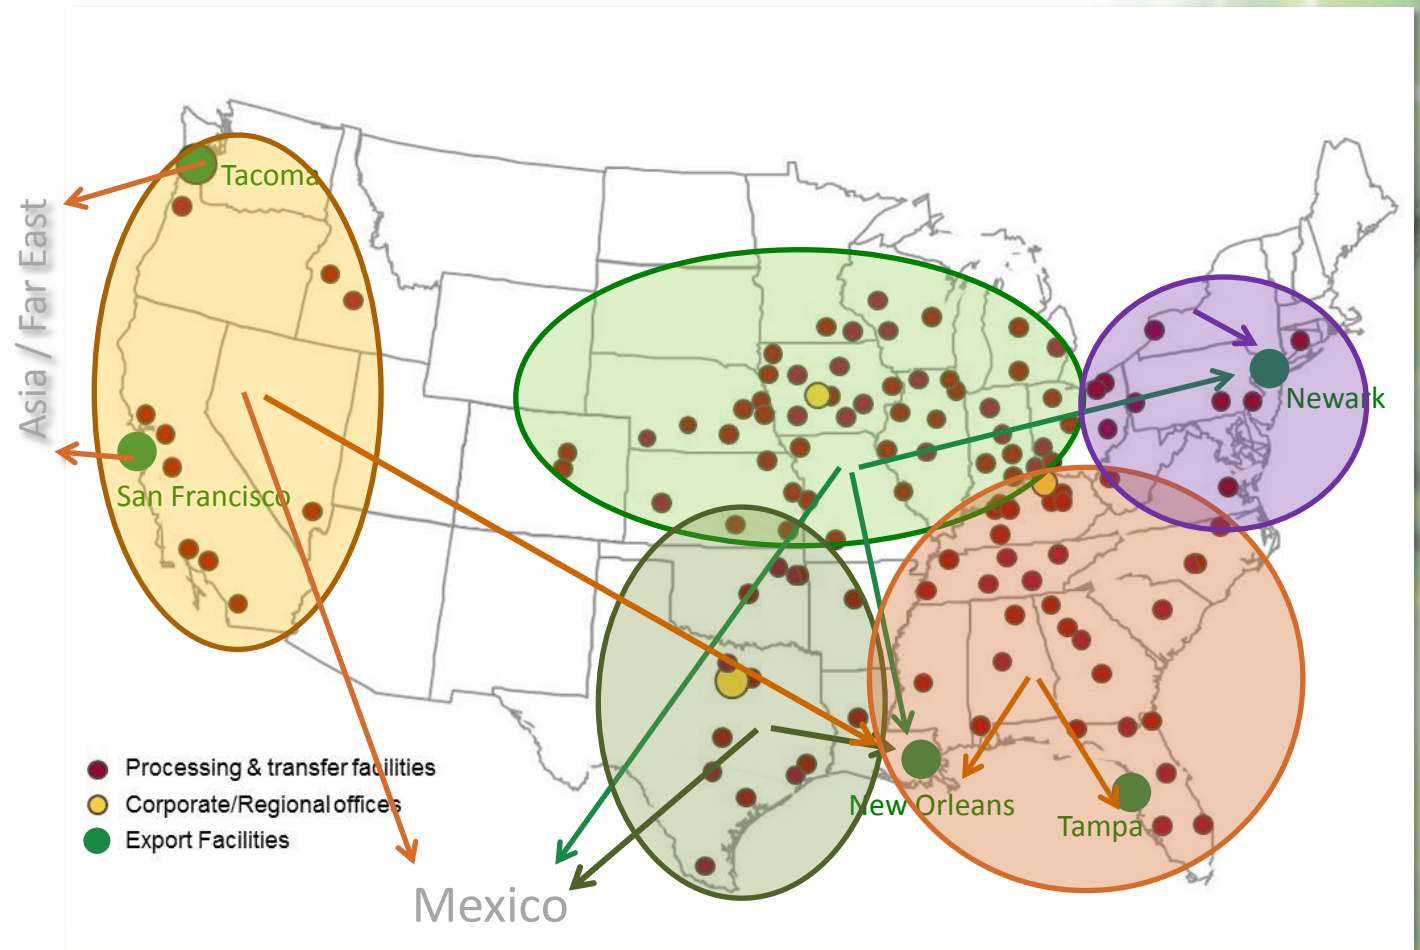

- ♻️ **Most economical feedstock** available – 1.135 billion pounds annually
- ♻️ DGD will be the **low cost producer** of the **highest quality product** capable of fulfilling the RFS2 biomass-based diesel mandate
- ♻️ D-975 diesel fuel is capable of distribution using **existing infrastructure**
 - 136.7 million gallons renewable diesel annually
 - 21.7 million gallons of LPG's and Naphtha

DGD Feedstock Origination

What we use defines our advantage

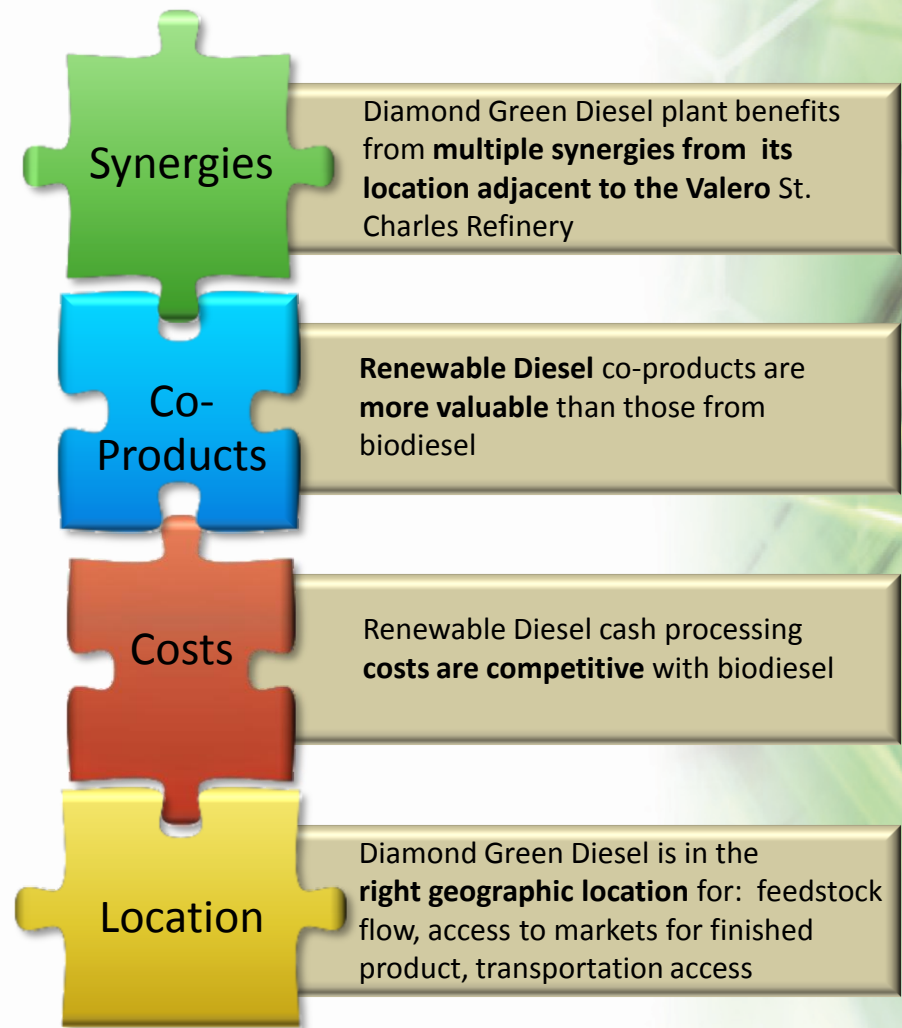

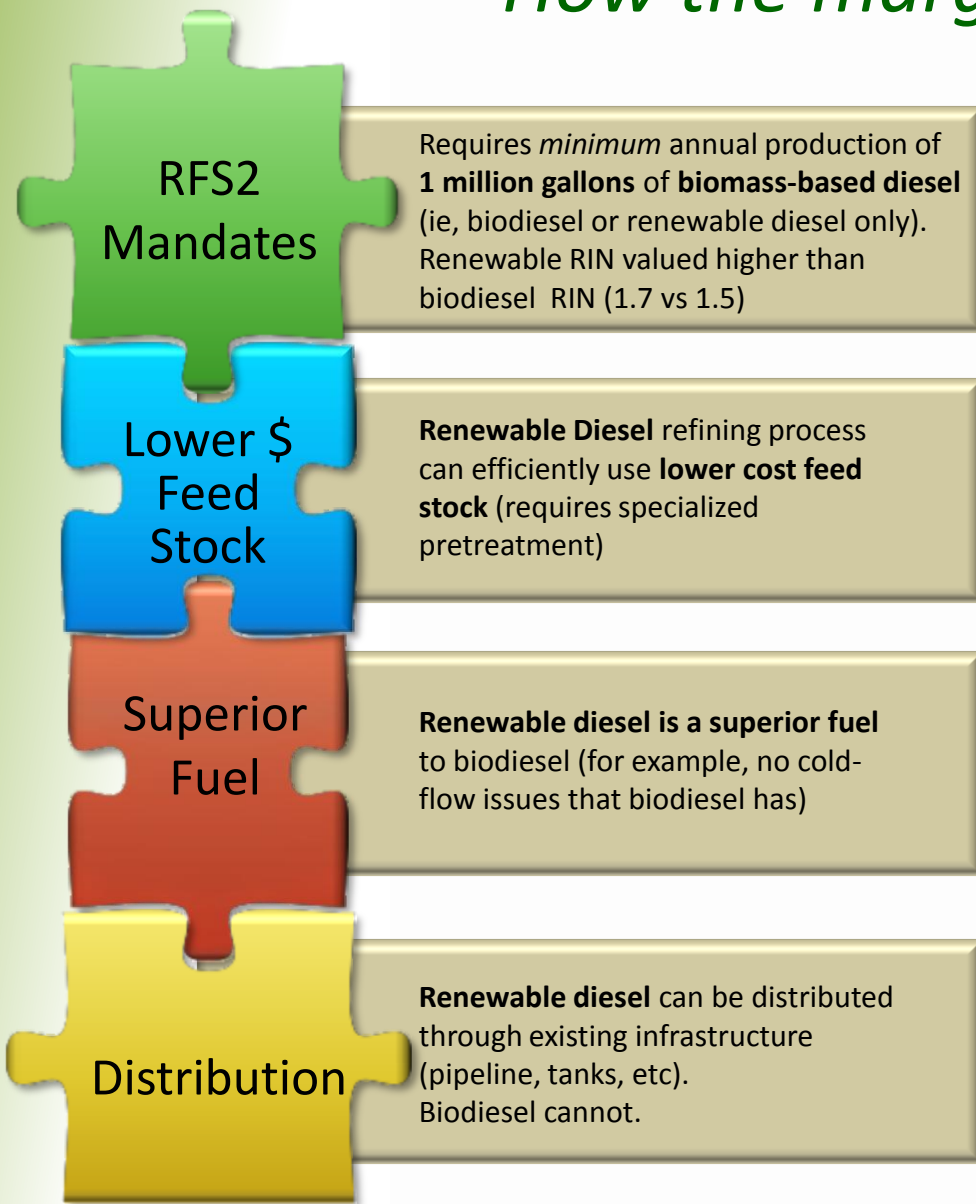

- ♻ Darling is one of the **largest suppliers** of animal fats and used cooking oils in the U.S.
- ♻ DGD is expected to **consume ~11%** of historical 10-year avg. supply of animal fats & used cooking oils

DGD will always have available supply of feedstock from Darling; however, DGD has the flexibility to purchase feedstock from other suppliers should that feedstock be more economical

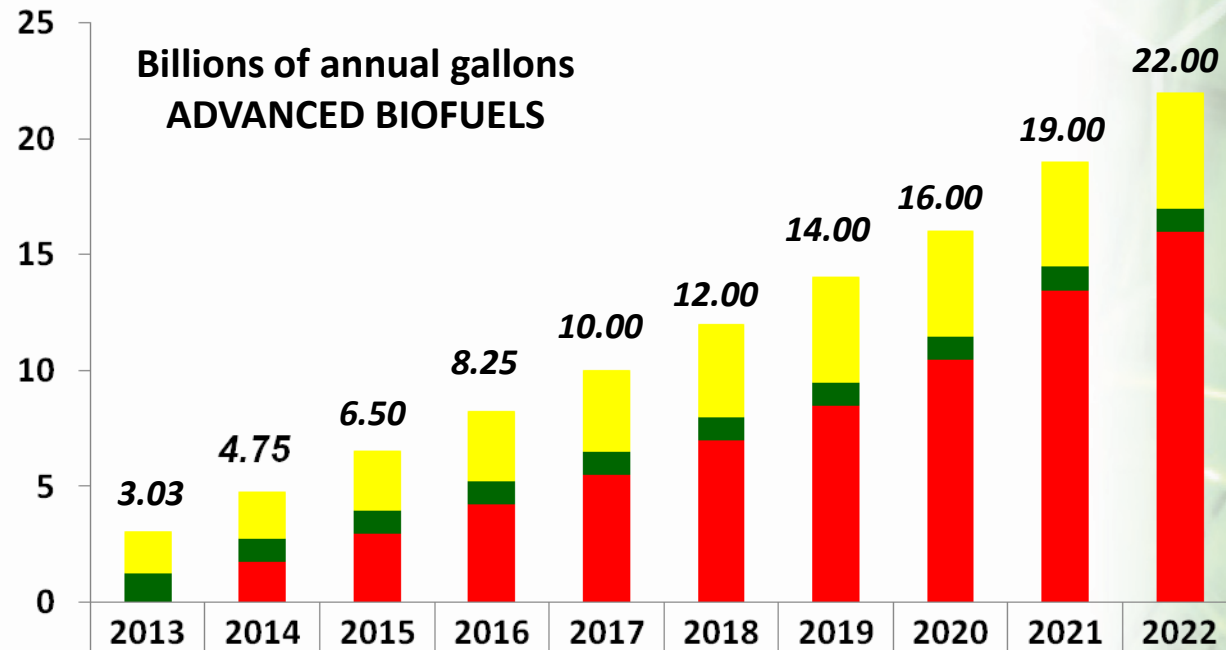

DGD Margin Foundation

How the margins are created

RFS2

The Bedrock

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Undifferentiated Advanced Biofuel	1.75	2.00	2.50	3.00	3.50	4.00	4.50	4.50	4.50	5.00
Biomass Based Diesel	1.28	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
Cellulosic	0	1.75	3.00	4.25	5.50	7.00	8.50	10.50	13.50	16.00

- Biomass-based diesel increased to 1.28 billion gallons in 2013
- Biomass-based diesel may be used to fulfill undifferentiated category

DGD Feedstock & Processing Advantage

FEEDSTOCK

Cost per gallon of Biofuel
2013 First Qtr. Average Prices (\$)

PROCESSING

Hydrogen vs. methanol

	First Qtr. 2013 Cost/gallon (\$)
DGD	.12
Biodiesel	.16

Energy efficiency

Although DGD utilizes much higher pressure and temperature than for biodiesel processing, the process is exothermic – heat generated from the process results in very little actual energy usage during processing

DGD Margin Equation

The Bottom Line

(\$ per gallon 1Q 2013 average)

Item	DGD Renewable Diesel	Advantage To:	Biodiesel (Midwest Soybean)
Diesel Fuel Price	3.08	↔	3.08
RIN's Value	1.09 (1.7 multiplier of .64)	←	.96 (1.5 multiplier of .64)
Biodiesel Tax Credit	1.00	↔	1.00
Distribution Cost/Discount	(0.07)	←	(0.39)
Fuel Value @ Plant	5.10	←	4.65
Co-product Value	0.32	←	0.09
TOTAL REVENUE	5.42	←	4.74
Raw Material Cost Delivered Plant	3.65	←	4.13
Processing Aids	0.12	←	0.16
Cash Processing Cost	0.26	↔	0.26
TOTAL PROCESSING COST	4.03	←	4.55
EBITDA	1.39	←	0.19

DGD RENEWABLE DIESEL has the ADVANTAGE in:

RIN's value (.13); distribution cost (.32); co-product value (.23);
raw material (.48); and processing aid (.04)

Note: Above pro forma assumes revenue, feedstock and production costs are consistent with projections from 1Q 2013 averages.

DARLING EBITDA & Pro Forma DGD EBITDA

Diamond Green Diesel... Creating a New Market

Note: Above pro forma assumes revenue, feedstock and production costs are consistent with projections.
